Heather has what is probably the most complete list of active exploration in the area. She completed in depth research to make sure she included everyone for the cumulative effects chapter. We defined "active" exploration in a certain way so it may be more complete than the state applications.

We certainly have the URL for the 2006 application(<http://dnr.alaska.gov/mlw/mining/largemine/pebble/water-right-apps/index.cfm>). We also have parts of the whole thing. The actual document is very large.

Hey Palmer – On your first question. I just recalled that in April 2011, I worked with Phil on information request letters to mining claim owners in the assessment area. Here is the map, a list of corporations owning the claims and the file of sent letters. Hope this helps. Judy

I researched in the State's databases back to 2007 and found exploration applications from the following facilities for activities in the Iliamna and Dillingham areas:

Humble, Big Chunk, Pebble, Full Metal (NFK), Pebble, Stuy Mines (Kaskanak), Pebble South, Kuy Project, and Fog Project.

Hi Cindi – I didn't see you in the TO list and you are probably the person who can answer the first question. Judy

**Subject:** Two BB questions

BB team:

I have two questions for the team:

- 1) Approximately how many claims in the Nush and Kvi can be characterized as “under exploration”?
- 2) Do we have a pdf copy or URL to the full 2006 water rights application NDM filed with the state?

Thanks, Palmer
